Setting a Google Account

You can use online services provided by Google, such as Gmail and Google Play, by setting up a Google account.
This section describes how to set up an account on the initial settings screen, which appears when you first switch on the power after purchasing the product.

User name	Register your Google account (user ID) and the characters that you want to use as your mail address. You can register any user name, but you cannot set the same user name as another user's.
Password	Register a password for using your Google account.

Tap "Next"

Tap the network that you will connect to
* Tap "Next" if you do not need to set internet connection.

Enter your password and tap "Connect" → Confirm the connection → Tap "Next"
* This step is not required if you select a Wi-Fi® network without security settings.

Tap "No"
* If you already have a Google account, tap "Yes".

Tap "Get an account"

Enter your first and last names and tap " ▶ " → Enter your email address and tap " ▶ " → Enter your password and tap " ▶ "
* Email addresses already being used by another user cannot be used.
* Enter the password twice for confirmation.

Choose a security question, answer, and recovery email address → Tap " ▶ "
* Recovery email address will be used in case you forget your password. Input can be omitted.

Tap "Not now"
* If you are joining Google+, tap "Join Google+".

Confirm the contents and tap " ▶ " → Enter the text displayed then tap " ▶ "

Tap "Not now"
* If you are purchasing applications from Google Play, enter your Card number and tap "Save".

Confirm the contents and tap backup method → Tap " ▶ "

Confirm the contents and tap " ▶ "

Select front touch button combination and theme → Tap "Next"

Enter your phone name then tap "Done"

au Easy Setting

■ Setting au ID

This section describes how to set up an au ID on the initial settings screen, which appears when you first turn on the power after purchasing the product.
The settings can be changed with the "au ID Setting" application.

au ID *	Register your au phone number or any other character string as an au ID.
au ID Password	Register the password for the au ID.

* The same au ID as another user's cannot be registered.

Tap "Next"

Tap "Registration"

Confirm the contents → Tap "OK"

Tap "au IDの設定・保存 (Set/Save au ID)"

Enter the security code → Tap "OK"

Set up password → Confirm "注意事項 (Precautions)" and "利用規約 (Terms of use)" → Tap "利用規約に同意して新規登録 (Agree with the terms of use and newly register)"

Tap "OK (auスマートパスへ) (Go to au Smartpass)"
* If you do not want to receive push notifications, tap "設定はコチラ (Go to Settings)", then follow onscreen instruction.

The screen displays the setting has been completed.
* Tap "設定画面へ (Go to setting screen)" and register information required to retrieve password.

Enter 生年月日 (Date of birth), 秘密の質問 (security question), and 秘密の質問の答え (answer for the question) → Tap "入力完了 (Done)" → "設定 (Settings)" → "終了 (Finish)"

Tap "Next"
* If there are data to hand over, tap "Agree, and next" then hand over data.

Place check marks next to data you want to backup then tap "Agree, and next".
* If you do not need to use this service, tap "Next".

If you want to use au Widget/LISMO, confirm "Terms of Service"/"Outline of Service" then place check marks next to them → "Agree, and next".
* If you do not need to use this service, tap "Next".

Confirm "Terms of Service"/"Outline of Service" of the Service you utilize and place check marks next to them → "Agree, and next" → "Activate".
* If you do not need to use this service, tap "Next".

Confirm the contents → Tap "Activate"
* This screen appears only when leaving check mark on 3LM(Loss or Theft Measures*).

Tap "Finish"

Setting Wireless LAN (Wi-Fi®)

By using the wireless LAN (Wi-Fi®)function, you can access to the Internet using a wireless LAN environment built in your home or a public wireless LAN environment away from home.
When setting the wireless LAN (Wi-Fi®) as described in this guide, you need to be in an environment where the radio waves can be received from the wireless LAN device or public wireless LAN that you want to access to.
Check the following information before setting the wireless LAN (Wi-Fi®) function.

SSID	The name set for the wireless LAN device or public wireless LAN service that you are connecting to
Password	The password for connecting to the wireless LAN device or public wireless LAN service

* Connection to all public wireless LAN services is not guaranteed.
* You may need a separate contract with a service provider to use some public wireless LAN services.
* Enabling the wireless LAN (Wi-Fi®) function uses a lot of battery power. We recommend turning off the wireless LAN (Wi-Fi®) function when not using it.

On the home screen, tap " ⊞ "

Tap "Basic" → " ⚙ "

Tap "Wi-Fi"

Tap "Continue"*1

Tap "OK" → " ◼ "

The wireless LAN (Wi-Fi®) function is enabled, and the available wireless LAN (Wi-Fi®) networks are detected.

"OK" → Tap the SSID of the wireless LAN (Wi-Fi®) network that you are connecting to
* If the wireless LAN (Wi-Fi®) network that you want to connect to is not displayed, tap " ☰ " → "Add network" and register it manually.

Tap "OK" → Enter Password → "Connect"
* This step is not required if you select a wireless LAN (Wi-Fi®) network without security settings.

The setting is complete when " ⬛ " appears at the top of the screen.

*1 "Wi-Fi tutorial" will not be displayed when setting up for the second time or later. If you want to display it again, tap "Wi-Fi" then tap " ☰ " → "Interactive tutorial".

E-mail Settings and Backup

E-mail (@ezweb.ne.jp) is a service that enables you to exchange e-mails with other cell phones, which support e-mail, and with PCs. Your e-mail address is decided automatically after the initial settings.
The e-mail address set in the initial settings can be changed.

■ Initial Settings

On the home screen, tap " ✉ "

Confirm the contents and tap "接続する (Connect)"
Once the initial settings for e-mail are completed, your e-mail address appears.

■ Confirming your e-mail address

On the E-mail screen, tap " ≡ " → Tap "E-mail settings"

Tap "E-mail information"

Your e-mail address appears in the e-mail address field.

■ Changing your e-mail address

On the E-mail screen, tap " ≡ " → Tap "E-mail settings"

Tap "Other settings"

Tap "接続する (Connect)"

Tap "Eメールアドレスの変更 (Changing E-mail address)"

Enter the security code → Tap "送信 (Send)"

Confirm the contents and tap "承諾する (Accept)"
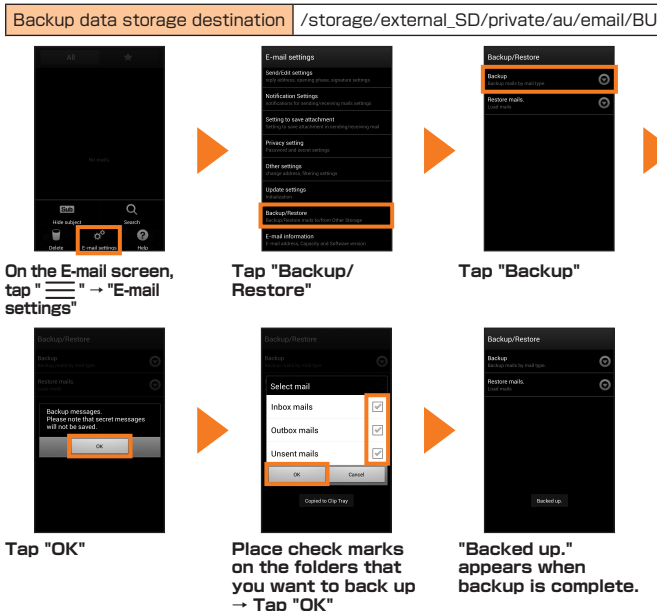

Enter e-mail address → Tap "送信 (Send)"

Tap "OK"

Tap "閉じる (Close)"

■ E-mail backup

You can back up your e-mails by folder to a microSD memory card. The product can also retrieve the backup data that has been saved on a microSD memory card.

| Backup data storage destination | /storage/external_SD/private/au/email/BU |

On the E-mail screen, tap " ≡ " → "E-mail settings"

Tap "Backup/Restore"

Tap "Backup"

Tap "OK"

Place check marks on the folders that you want to back up → Tap "OK"

"Backed up." appears when backup is complete.

PC mail
PC mail can be used to send/receive E-mail from this product by setting a mail account that you normally use on your PC.

Gmail
Gmail is a mail service provided by Google. You can send/receive Gmail from this product. You can also use Gmail from the PC or the browser on this product and share mail information.

Making Calls
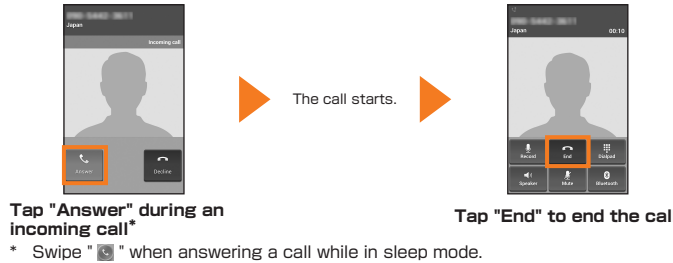

■ Entering a phone number to make a call

On the home screen, tap " 📞 "

Enter a phone number and tap " 📞 "

■ Calling from Contacts

On the phone screen, tap "Contacts"

Tap the other party that you want to call

Tap " 📞 "

■ Calling from Call logs

On the phone screen, tap "Call logs"

Tap the other party that you want to call

Tap " 📞 "

Receiving Calls

The call starts.

Tap "Answer" during an incoming call*

Tap "End" to end the call

* Swipe " 📞 " when answering a call while in sleep mode.

Transferring Contacts

You can transfer data from your old phone to this product using a microSD memory card.

Save the contacts (address book) from your old phone to a microSD memory card, and insert the card into the product
Refer to the instruction manual of your old phone, etc. on how to save the contacts.

On the home screen, tap " ⊞ " → "Basic" → " 📇 "

Tap " ≡ " → "Import/Export"

Tap "Import from SD card"*

Select the item that you want to import → Tap "Import"

Tap "Yes"

* If multiple accounts are registered, a screen appears to select which account to import to. Select the account that you want to import data to.
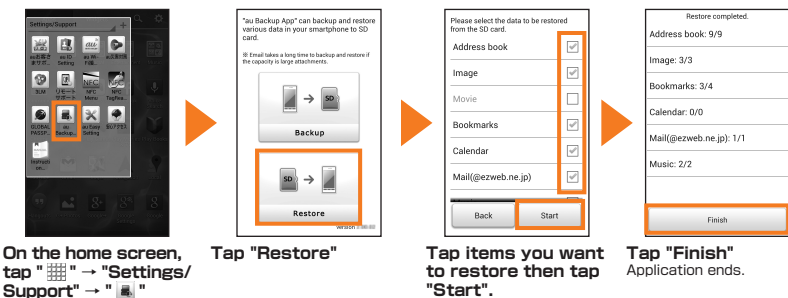

Backup from Main Unit to microSD Memory Card

This section describes how to back up and restore data from the product main unit to a microSD memory card.

| Backup data storage destination | /storage/external_SD/auBackupApps |

■ Backup

On the home screen, tap " ⊞ " → "Settings/Support" → " ⊡ "

Confirm the contents and tap "Next"
* This appears on the first startup only.

Tap "Backup"

Select items you want to back up then tap "Next"

Tap "Backup Start"
* If setting up the password, tap "Set the password".

Tap "OK"

Tap "Finish"
Application ends.

■ Restore

On the home screen, tap " ⊞ " → "Settings/Support" → " ⊡ "

Tap "Restore"

Tap items you want to restore then tap "Start".

Tap "Finish"
Application ends.

Send/receive via infrared

You can send/receive data (My profile, Contact, Scheduler, Gallery) using infrared communication.

### ■ Receive contact data via infrared communication

On the home screen, tap " ⊞ " → "Tools" → " 📡 "

Tap "Receive all"

Input 4 digits code (authentication code) and tap "OK"

"File transfer" is displayed once infrared reception starts.

When "Received data will be saved. Continue?" appears, tap "OK"

Reception is complete when "○○○ saved" appears
Infrared communication ends automatically.

■ Send contact data via infrared communication

On the home screen, tap " ⊞ " → "Tools" → " 📡 "

Tap "Send" → "Contact"

Select the contact data that you want to send → Tap "Done"

If "Infrared authentication" appears, input 4 digits code (authentication code) and tap "OK"

"File transfer" is displayed once infrared transmission starts.

Transmission is complete when "○○ sent" appears
Infrared communication ends automatically.

Reducing Battery Consumption

■ Using Battery Saver

Set up to switch to Battery Saver Mode automatically when the battery is running low.

On the home screen, tap " ⊞ " → "Basic" → "General" → "Battery"

Tap "Battery saver"

Tap " ◯ " to make it to the position to.
" ≡ " → Tap the item you want to enable.

■ Close running applications

Closing applications not in use can reduce battery consumption.

On the home screen, tap " ⊞ " → "Tools"

Tap " 🗂 "

Tap "Stop" for applications that you want to close or tap "Stop all"
